

Technical Sheet

GommAmica® Playground Black

Description

The safety of a playground area depends both of the characteristics of the structures and the type of flooring present in the area surrounding it. Thus GommAmica® Playground Black is born.

Origin

Car and track used tires (main european brands).

Coating

Not coated.

Colour

Black.

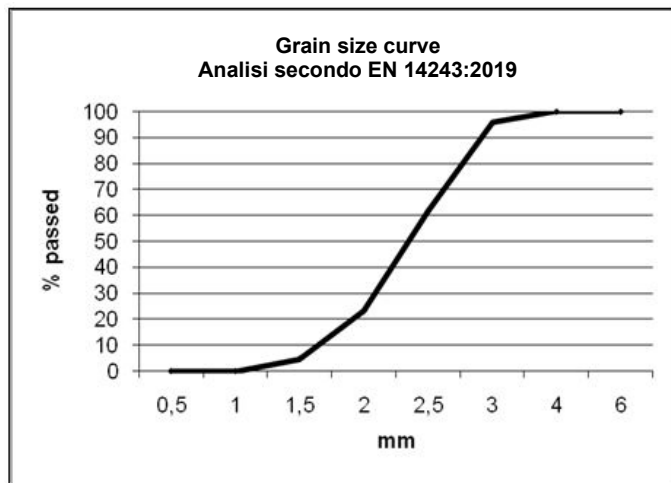

Applications

Black rubber granulate specially designed for flooring and the safety of playground areas. With GommAmica® Playground the playground structures could be easily reached without danger, thanks to a perfect elastic surface (made up of 5 cm of SBR rubber granulate), well leveled and approved according to the EN 1177 safety standard.

Production technology

The product is obtained through a process of mechanical grinding and magnetic separation of the debris. During the entire process no other solid, liquid or gaseous substances are added.
